American Journal of Physiology: Gastrointestinal and Liver Physiology

No. 1. JULY 1993

INVITED REVIEW

Regulation of hepatic Na^+-HCO_3^- cotransport and pH by membrane potential difference
J. G. Fitz, S. D. Lidofsky, and B. F. Scharschmidt G1

Hepatic, renal, and total body galactose elimination in the pig
K. Winkler, J. H. Henriksen, and N. Tygstrup G9

Hepatic vein, hepatic parenchymal, and inferior vena caval mechanoreceptors with phrenic afferents
D. R. Kostreva and S. P. Pontus G15

Autoradiographic characterization of angiotensin II receptor subtypes in rat intestine
L. A. Sechi, J.-P. Valentin, C. A. Griffin, and M. Schambelan G21

Potassium conductance in rabbit esophageal epithelium
W. E. Khalbuss, R. Alkiek, C. G. Marousis, and R. C. Orlando G28

Role of calcium fluxes in the action of glucagon on glucose metabolism in rat hepatocytes
T. Mine, I. Kojima, and E. Ogata G35

pH regulation in perfused rat liver: respective role of Na^+-H^+ exchanger and Na^+-HCO_3^- cotransport
T. Durand, J.-L. Gallis, S. Masson, P. J. Cozzone, and P. Canioni G43

Mechanism of action of capsaicin on submucosal arterioles in the guinea pig ileum
S. Vanner G51

Timed photoaffinity labeling and characterization of bile acid binding and transport proteins in rat ileum
M. C. Lin, E. Mullady, and F. A. Wilson G56

Orogastric EGF enhances c-*neu* and EGF receptor phosphorylation in suckling rat jejunum in vivo
J. F. Thompson, R. M. Lamprey, and P. C. F. Stokkers G63

Electrogenicity of Na-coupled bile salt transport in isolated rat hepatocytes
S. A. Weinman and R. P. Weeks G73

Genetic evidence for role of DPP IV in intestinal hydrolysis and assimilation of prolyl peptides
C. Tiruppathi, Y. Miyamoto, V. Ganapathy, and F. H. Leibach G81

Characterization of Na^+-independent glutamine transport in rat liver
A. J. Pacitti, Y. Inoue, and W. W. Souba G90

Expression of rat intestinal L-lysine transport systems in isolated oocytes of *Xenopus laevis*
C. M. Harvey, W. R. Muzyka, S. Y.-M. Yao, C. I. Cheeseman, and J. D. Young G99

Evidence for indirect dietary regulation of cholecystokinin release in rats
A. I. Sharara, E. P. Bouras, M. A. Misukonis, and R. A. Liddle G107

Neurotensin and oxyntomodulin-(30—37) potentiate PYY regulation of gastric acid and somatostatin secretions
A. Bado, D. Cloarec, L. Moizo, J.-P. Laigneau, D. Bataille, and M. J. M. Lewin G113

Actions of *Helodermatidae* venom peptides and mammalian glucagon-like peptides on gastric chief cells
A. Rai, G. Singh, R. Raffaniello, J. Eng, and J.-P. Raufman G118

Tumor necrosis factor-α produces hepatocellular dysfunction despite normal cardiac output and hepatic microcirculation
P. Wang, A. Ayala, Z. F. Ba, M. Zhou, M. M. Perrin, and I. H. Chaudry G126

Gastric damage caused by acidified ethanol: role of molecular HCl
J. C. Barreto, G. S. Smith, D. H. Russell, and T. A. Miller G133

Lateral hypothalamic lesions cause gastric injury by stimulating gastric contractility
T. Garrick, C. V. Grijalva, and M. Trauner G138

Effect of $1,25(OH)_2D_3$ and its analogues on membrane phosphoinositide turnover and $[Ca^{2+}]_i$ in Caco-2 cells
X.-Y. Tien, T. A. Brasitus, B. M. Qasawa, A. W. Norman, and M. D. Sitrin G143

Cholecystokinin receptors and PANC-1 human pancreatic cancer cells
J. P. Smith, C. A. Rickabaugh, P. J. McLaughlin, and I. S. Zagon G149

Gastrointestinal longitudinal muscle contractions
S. K. Sarna G156

Arterial constriction, ischemia-reperfusion, and leukocyte adherence in acute pancreatitis
K. Kusterer, T. Poschmann, A. Friedemann, M. Enghofer, S. Zendler, and K. H. Usadel G165

Macrophage activation and leukocyte adhesion after liver transplantation
I. Marzi, F. Walcher, and V. Bühren G172

Cellular localization and hormonal regulation of pancreatic intrinsic factor secretion in dogs
K. W. Simpson, D. H. Alpers, J. De Wille, P. Swanson, S. Farmer, and R. G. Sherding G178

Nitric oxide donors reduce the rise in reperfusion-induced intestinal mucosal permeability
D. Payne and P. Kubes G189

Responses of the human esophagus to experimental intraluminal distension
D. Williams, D. G. Thompson, L. Heggie, and J. Bancewicz G196

ANNOUNCEMENTS G204

No. 2. AUGUST 1993

INVITED REVIEW

Trefoil peptides: a newly recognized family of epithelial mucin-associated molecules
R. Poulsom and N. A. Wright G205

Nitric oxide synthase induction and intestinal epithelial cell viability in rats
B. L. Tepperman, J. F. Brown, and B. J. R. Whittle G214

Central and peripheral effects of CCK receptor antagonists on satiety in dogs
C. A. Cheng, J. G. Geoghegan, D. C. Lawson, S. U. Berlangieri, O. Akwari, and T. N. Pappas G219

Protein phosphatase inhibition and in vivo hepatotoxicity of microcystins
M. T. Runnegar, S. Kong, and N. Berndt G224

Omeprazole decreases H^+-K^+-ATPase protein and increases permeability of oxyntic secretory membranes in rabbits
J. M. Crothers, Jr., D. C. Chow, and J. G. Forte G231

Interaction between cholephilic anions and bile acid transport across basal membrane of human trophoblast
P. Bravo, M. Y. A. El-Mir, M. A. Serrano, R. Boyd, and J. J. G. Marin G242

Somatostatin inhibits pancreatic enzyme secretion at a central vagal site
Y. Li and C. Owyang G251

Physiological and morphological properties of neurons in sphincter of Oddi region of the guinea pig
D. G. Wells and G. M. Mawe G258

Cholinergic regulation of guinea pig duodenal bicarbonate secretion
H. S. Odes, R. Muallem, R. Reimer, W. Beil, M. Schwenk, and K.-F. Sewing G270

Effects of ammonium ion and ammonia on function and morphology of in vitro frog gastric mucosa
A. Yanaka, H. Muto, S. Ito, and W. Silen G277

Dipeptide transporters in apical and basolateral membranes of the human intestinal cell line Caco-2
H. Saito and K.-I. Inui G289

PACAP is a stimulator of neurogenic contraction in guinea pig ileum
S. Katsoulis, A. Clemens, H. Schwörer, W. Creutzfeldt, and W. E. Schmidt G295

Influence of tactile stimulation of the rat gastric mucosa on blood flow and acid output
L. Holm and A. Jägare G303

Mechanoreceptors sensitive to flow at the gastroduodenal junction of the cat
C.-H. Malbert and L.-M. Leitner G310

Cardiac function and responsiveness to β-adrenoceptor agonists in rats with obstructive jaundice
G. Jacob, N. Nassar, G. Hayam, S. Ben-Haim, Y. Edoute, O. S. Better, and A. Bomzon G314

Substance P levels in experimental ileitis in guinea pigs: effects of misoprostol
M. J. S. Miller, H. Sadowska-Krowicka, A. Y. Jeng, S. Chotinaruemol, M. Wong, D. A. Clark, W. Ho, and K. A. Sharkey G321

Decreased expression of protooncogenes c-*fos*, c-*myc*, and c-*jun* following polyamine depletion in IEC-6 cells
J.-Y. Wang, S. A. McCormack, M. J. Viar, H. Wang, C.-Y. Tzen, R. E. Scott, and L. R. Johnson G331

Identification of a 5-hydroxytryptamine (5-HT_2) receptor on guinea pig small intestinal crypt cells
A. K. Siriwardena, E. H. Smith, E. H. Borum, and J. M. Kellum, Jr. G339

Intracellular alkalinization stimulates bile flow and vesicular-mediated exocytosis in IPRL
R. Bruck, A. Benedetti, M. Strazzabosco, and J. L. Boyer G347

Effect of maternal sialoadenectomy on ontogenic response of rat gastric mucosa to luminal H^+
B. L. Tepperman, B. L. Vozzolo, and B. D. Soper G354

TGF-α is a potent mitogen for primary cultures of guinea pig gastric mucous epithelial cells
M. J. Rutten, P. J. Dempsey, T. E. Solomon, and R. J. Coffey, Jr. G361

Na^+-K^+-$2Cl^-$ cotransport and Cl^- secretion evoked by heat-stable enterotoxin is microfilament dependent in T84 cells
J. B. Matthews, C. S. Awtrey, R. Thompson, T. Hung, K. J. Tally, and J. L. Madara G370

Cell survival in rabbit gastric glands: effect of extracellular pH, osmolarity, and anoxia
K. J. Carter, H. H. Lee, P. J. Goddard, A. Yanaka, H. Paimela, and W. Silen G379

Altered jejunal potassium (Rb^+) transport in piglet rotavirus enteritis
J. P. Woodard, W. Chen, E. O. Keku, S.-C. C. Liu, J. G. Lecce, and J. M. Rhoads G388

RAPID COMMUNICATIONS

Peptide-regulated guanylate cyclase pathways in rat colon: in situ localization of GCA, GCC, and guanylin mRNA
Z. Li and M. F. Goy G394

Biphasic effect of SNP on opossum esophageal longitudinal muscle: involvement of cGMP and eicosanoids
J. K. Saha, I. Hirano, and R. K. Goyal G403

No. 3. SEPTEMBER 1993

INVITED REVIEW

On the coupling of membrane digestion with intestinal absorption of sugars and amino acids
J. R. Pappenheimer G409

Nitric oxide generators and cGMP stimulate mucus secretion by rat gastric mucosal cells
J. F. Brown, A. C. Keates, P. J. Hanson, and B. J. R. Whittle G418

Stimulation of Cl permeability in colonic crypts of Lieberkühn measured with a fluorescent indicator
D. R. Halm, K. L. Kirk, and K. C. Sathiakumar G423

Plasticity in the gastric inhibitory innervation after immunization against VIP and vagotomy in the ferret
D. Grundy, M. K. Gharib-Naseri, and D. Hutson G432

Gastrin cell responses to acidification of the achlorhydric rat stomach
G. J. Dockray, R. Dimaline, E. R. Forster, D. Evans, A. Sandvik, and A. Varro G440

Preserved organic anion transport in mutant TR^- rats with a hepatobiliary secretion defect
P. L. M. Jansen, J.-W. Van Klinken, M. Van Gelder, R. Ottenhoff, and R. P. J. Oude Elferink G445

Prostaglandin modulation of the gastric vasculature and mucosal integrity in cirrhotic rats
P. L. Beck, W. McKnight, S. S. Lee, and J. L. Wallace G453

Epidermal growth factor and the maturation of intestinal sucrase in suckling rats
C. Foltzer-Jourdainne, J.-C. Garaud, E. Nsi-Emvo, and F. Raul G459

Mechanism of leukotriene D_4 stimulation of Cl^- secretion in rat distal colon in vitro
C. S. Hyun and H. J. Binder G467

Role of endogenous endothelin in pathogenesis of ethanol-induced gastric mucosal injury in rats
E. Masuda, S. Kawano, K. Nagano, S. Tsuji, Y. Takei, N. Hayashi, M. Tsujii, M. Oshita, T. Michida, I. Kobayashi, H.-B. Peng, H. Fusamoto, and T. Kamada G474

Differential expression of the neurotensin gene in the developing rat and human gastrointestinal tract
B. M. Evers, S. Rajaraman, D. H. Chung, C. M. Townsend, Jr., X. Wang, K. Graves, and J. C. Thompson G482

Gastric ulcer induced by submucosal injection of ET-1: role of potent vasoconstriction and intraluminal acid
S. Lazaratos, H. Kashimura, A. Nakahara, H. Fukutomi, T. Osuga, T. Urushidani, T. Miyauchi, and K. Goto G491

Direct and indirect mechanosensory pathways from the colon to the inferior mesenteric ganglion
H. P. Parkman, R. C. Ma, W. H. Stapelfeldt, and J. H. Szurszewski G499

HNF-1α and HNF-1β expression in mouse intestinal crypts
M. S. Serfas and A. L. Tyner G506

Transcriptional and posttranscriptional control in synthesis of growth marker polypeptides in mouse parotids
R. O. López Solís, M. J. González, L. Castillo, S. Peña y Lillo, and C. Alliende G514

Endogenous somatostatin inhibits histamine release from canine gastric mucosal cells in primary culture
C.-N. Chuang, M. Tanner, K. C. K. Lloyd, H. Wong, and A. H. Soll G521

The human sucrase-isomaltase gene directs complex patterns of gene expression in transgenic mice
A. J. Markowitz, G. D. Wu, E. H. Birkenmeier, and P. G. Traber G526

Duodenal acid-induced inhibition of gastric motility and emptying in rats
H. E. Raybould and H. H. Hölzer G540

Hepatic uptake of intact glutathione *S*-conjugate, inhibition by organic anions, and sinusoidal catabolism
C. A. Hinchman, A. T. Truong, and N. Ballatori G547

Calibration of albumin-fatty acid binding constants measured by heptane-water partition
F. J. Burczynski, S. M. Pond, C. K. Davis, L. P. Johnson, and R. A. Weisiger G555

Propionate activates multiple ion transport mechanisms in the HT29—18-C_1 human colon cell line
W. A. Rowe, D. L. Blackmon, and M. H. Montrose G564

Cerebral metabolic and histological effects of thioacetamide-induced liver failure
J. Peeling, L. Shoemaker, T. Gauthier, A. Benarroch, G. R. Sutherland, and G. Y. Minuk G572

Peripheral vascular neuroeffector mechanisms in experimental cholestasis
G. Jacob, O. Said, J. Finberg, and A. Bomzon G579

SPECIAL COMMUNICATION

Evaluation and validation of microsphere technique for determination of pancreatic blood flow
W. Harringer, C. Fernández-Del Castillo, D. W. Rattner, J. L. Guerrero, A. L. Warshaw, and G. J. Vlahakes G587

LETTERS TO THE EDITOR

Limitations of laser-Doppler velocimetry and reflectance spectrophometry in estimating gastric mucosal blood flow
A. M. Wheatley, M. Casadevall, J. Panés, and J. M. Piqué G595

No. 4. OCTOBER 1993

INVITED REVIEW

Immunophysiology of the gut: a research frontier for integrative studies of the common mucosal immune system
G. A. Castro and C. J. Arntzen G599

PAP, a pancreatic secretory protein induced during acute pancreatitis, is expressed in rat intestine
J. L. Iovanna, V. Keim, A. Bosshard, B. Orelle, J.-M. Frigerio, N. Dusetti, and J.-C. Dagorn G611

Migrating spike complex in the small intestine of the fasting cat
W. C. De Vos G619

Role of the enteric nervous system in the control of migrating spike complexes in the feline small intestine
W. C. De Vos G628

Interstitial cells in deep muscular plexus of canine small intestine may be specialized smooth muscle cells
S. Torihashi, S. Kobayashi, W. T. Gerthoffer, and K. M. Sanders G638

Gastric myoelectric and motor activity in dogs with gastric dilatation-volvulus
J. A. Hall, T. N. Solie, H. B. Seim, III, and D. C. Twedt G646

Gastrointestinal transit is not impaired by regional loss of myenteric neurons in rat jejunum
M. S. Luck, J. C. White, and P. Bass G654

VIP-mediated G protein-coupled Ca^{2+} influx activates a constitutive NOS in dispersed gastric muscle cells
K. S. Murthy, K.-M. Zhang, J.-G. Jin, J. R. Grider, and G. M. Makhlouf G660

Nutrient feedback inhibition of gastric emptying plays a larger role than osmotically dependent duodenal resistance
H. C. Lin, J. D. Elashoff, Y.-G. Gu, and J. H. Meyer G672

Proximal duodenal enterocyte transport: evidence for Na^+-H^+ and Cl^--HCO_3^- exchange and $NaHCO_3$ cotransport
J. I. Isenberg, M. Ljungström, B. Säfsten, and G. Flemström G677

Distribution of adenylate cyclase and GTP-binding proteins in hepatic plasma membranes
B. S. Dixon, E. Sutherland, A. Alexander, D. Nibel, and F. R. Simon G686

Origin of D-alanine present in urine of mutant mice lacking D-amino-acid oxidase activity
R. Konno, T. Oowada, A. Ozaki, T. Iida, A. Niwa, Y. Yasumura, and T. Mizutani G699

Quantitative relationship between liquid bolus flow and laryngeal closure during deglutition
D. J. Maddock and R. J. Gilbert G704

Modulation of uptake of heme by rat small intestinal mucosa in iron deficiency
S. K. Roberts, R. W. Henderson, and G. P. Young G712

Secretin causes H^+ secretion from intrahepatic bile ductules by vacuolar-type H^+-ATPase
O. Villanger, T. Veel, and M. G. Ræder G719

Involvement of phospholipase D in caerulein-induced phosphatidylcholine hydrolysis in rat pancreatic acini
G. Rydzewska, B. Rossignol, and J. Morisset G725

Characterization of cytochrome *P*-450-dependent arachidonic acid metabolism in rabbit intestine
C. Macica, M. Balazy, J. R. Falck, C. Mioskowski, and M. A. Carroll G735

Effects of the somatostatin analogue octreotide on rectal afferent nerves in humans
V. Plourde, T. Lembo, Z. Shui, J. Parker, H. Mertz, Y. Taché, B. Sytnik, and E. Mayer G742

Role of histamine$_2$ receptor in increased expression of rat gastric H^+-K^+-ATPase α-subunit induced by omeprazole
A. Tari, G. Yamamoto, K. Sumii, M. Sumii, Y. Takehara, K. Haruma, G. Kajiyama, V. Wu, G. Sachs, and J. H. Walsh G752

Nitric oxide regulates migrating motor complex cycling and its postprandial disruption
S. K. Sarna, M. F. Otterson, R. P. Ryan, and V. E. Cowles G759

Effects of gastric pacing on canine gastric motility and emptying
J. C. Eagon and K. A. Kelly G767

Na^+-K^+-ATPase gene expression in rat intestine and Caco-2 cells: response to thyroid hormone
R. A. Giannella, J. Orlowski, M. L. Jump, and J. B. Lingrel G775

Effect of ursodeoxycholic acid on intracellular pH regulation in isolated rat bile duct epithelial cells
D. Alvaro, A. Mennone, and J. L. Boyer G783

Mechanical properties of isolated smooth muscle from human rectum and internal anal sphincter
E. B. Glavind, A. Forman, G. Madsen, D. Svane, K. E. Andersson, and A. Tøttrup G792

RAPID COMMUNICATION

Inhibitory effect of CO on internal anal sphincter: heme oxygenase inhibitor inhibits NANC relaxation
S. Rattan and S. Chakder G799

No. 5. NOVEMBER 1993

Effect of [(CH_2NH)4,5]secretin on pancreatic exocrine secretion in guinea pigs and rats
C. D. Kim, P. Li, K. Y. Lee, D. H. Coy, and W. Y. Chey G805

Structural characterization of PACAP receptors on rat liver plasma membranes
T. D. Nguyen, G. G. Heintz, and M. S. Wolfe G811

Opposing gastric motor responses to TRH and substance P on their microinjection into nucleus raphe obscurus of rats
Z. K. Krowicki and P. J. Hornby G819

Sex differences in intracellular fatty acid transport: role of cytoplasmic binding proteins
B. A. Luxon and R. A. Weisiger G831

Mechanism of action of CCK in avian gastroduodenal motility: evidence for nitric oxide involvement
V. Martinez, M. Jimenez, E. Goñalons, and P. Vergara G842

Characterization of univectorial polyamine transport in duodenal crypt cell line
J.-L. Scemama, V. Grabié, and E. R. Seidel G851

Cyclin and cyclin-dependent kinase 1 mRNA expression in models of regenerating liver and human liver diseases
J. H. Albrecht, J. S. Hoffman, B. T. Kren, and C. J. Steer G857

Partial agonism by gastrin for a cholecystokinin receptor mediating pepsinogen secretion
L. H. Tang, M. D. Miller, J. R. Goldenring, I. M. Modlin, and S. J. Hersey G865

Potassium current in circular smooth muscle of human jejunum activated by fenamates
G. Farrugia, J. L. Rae, M. G. Sarr, and J. H. Szurszewski G873

TRH in dorsal vagal complex mediates acid response to excitation of raphe pallidus neurons in rats
H. Yang, G. Ohning, and Y. Taché G880

Actions of nitric oxide-generating sodium nitroprusside in myenteric plexus of guinea pig small intestine
K. Tamura, M. Schemann, and J. D. Wood G887

Comparison of plasma membrane FABP and mitochondrial isoform of aspartate aminotransferase from rat liver
D. D. Stump, S.-L. Zhou, and P. D. Berk G894

Intracellular pH-regulating ion transport mechanisms in parietal cell basolateral membrane vesicles
G. Lamprecht, U. Seidler, and M. Classen G903

Expression of gap junction connexin 43 and connexin 43 mRNA in different regional tissues of intestine in dog
Z. Li, Z. Zhou, and E. E. Daniel G911

Human and rat intestinal plasma membrane calcium pump isoforms
A. Howard, S. Legon, and J. R. F. Walters G917

Characterization of bumetanide transport in isolated skate hepatocytes
M. Blumrich, E. Petzinger, and J. L. Boyer G926

Nonparallel secretion of pepsinogen and acid by gastric oxyntopeptic cells of the toad (*Bufo marinus*)
M.-C. Ruiz, A. Acosta, M. J. Abad, and F. Michelangeli G934

Interaction of bumetanide derivatives with hepatocellular bile acid uptake
E. Petzinger, W. Föllmann, M. Blumrich, R. Schermuly, S. Schulz, J. Hahnen, and P. W. Feit G942

Regulation of paracellular permeability in Caco-2 cell monolayers by protein kinase C
W. F. Stenson, R. A. Easom, T. E. Riehl, and J. Turk G955

Pharyngeal, esophageal, and proximal gastric responses associated with vomiting
I. M. Lang, S. K. Sarna, and W. J. Dodds G963

Coordination of Cl^- secretion and contraction by a histamine H_2-receptor agonist in guinea pig distal colon
H. J. Cooke, Y.-Z. Wang, and R. Rogers G973

Cotransport of 2-methyl-aminoisobutyric acid and chloride in rabbit small intestine
